

Using ChatterBox

To maintain optimal mesh performance for your cluster, leave devices powered on all the time. When not carrying, try to leave them in locations with the maximum line of sight (ie: a window).

For the most part, use ChatterBox like you would use any other messaging app.

Touch or Swipe

- Swipe the screen to scroll up and down
- Tap/touch icons

Type on the Keypad

- For all text entry
- Hold *sym* key for numbers & symbols

Roll the Trackball

- Wakes up the display
- Scrolls the display up and down

Click the Trackball

- Wakes up the display
- Toggles between Home & Neighbors
- Other screen-specific functions

Home

View/reply to messages, device status. This is the main screen of ChatterBox.

Trackball Click to switch back and forth

Neighbors

View live signal strength & GPS coordinates of in-range devices

Cluster Devices

See all devices in the cluster (even out-of-range), filter your message view, more.

Location

Last known location for any device in your cluster (even out-of-range), where they are in relation to you.
