

Home - Connectivity, Status, & Menu

Messages - See, send, reply, delete, status

Neighbors / Signal Strength

- 1+ Neighbors, Excellent Signal
- 1+ Neighbors, Great Signal
- 1+ Neighbors, OK Signal
- 0 Neighbors -or- Poor Signal

Neighbors - Who's in direct range right now

Location - Where are others, relative to you

Wake

Get device's attention, wake screen

Power

Push, hold, or slide to power off/on

Usage Tips

- For best results, leave devices powered on as often as possible. It makes your cluster perform better.
- When sending a message, instead of constantly monitoring the screen, let the screen sleep and leave it alone for a minute or two. *This is when meshing happens.*
- If someone doesn't appear on the neighbors screen, send a message anyway! They may be just beyond range or powered off. *Let the meshing do its thing.*
- Mesh range can be much further than direct range. *The neighbors screen only shows devices in direct range.*

Message Source

Who sent it & how is it being delivered?

	You sent DM (not mesh)
	You received DM (not mesh)
	You sent DM via mesh
	You received DM via mesh
	You sent a broadcast
	You received a broadcast

Message Status

Was it completed? Was it picked up via mesh?

	All message packets sent directly, not yet confirmed
	DM: Message was decrypted/validate and fully delivered to the other device
	Broadcast: At least one other device is now re-broadcasting your message
	Message packets are waiting to mesh in your out queue
	Your message was accepted into the mesh cache, and other devices are pushing it toward the recipient
	Your message is confirmed delivered & accepted by the end recipient via mesh
