

Using ChatterBox Location

Location Sharing

Private Cluster: Devices regularly share location and movement information (unless disabled).

Open Channels: you can decide whether to include location in any broadcast you send.

- Location information is always encrypted when transmitted or stored.

Touch any live or stale GPS on your device to view a map or QR code

Live GNSS
Fresh Location

Stale Location

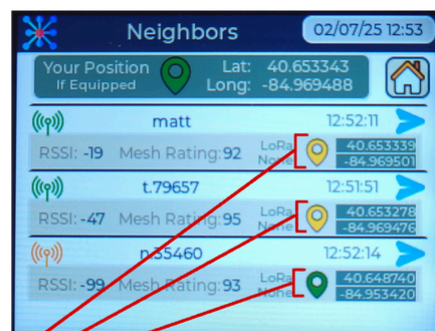

No GNSS
No location

View Current Location

View Other Device Location

Map Orientation

- The top of the map view always faces North
- North is considered 0°
- You are always at the center of the map

Filtering the View

- Touch the GPS icon on the home screen
- Touch the filter button
- Add the devices you want to see, one at a time
- Touch the red icon to immediately show critical contacts
